

CMSI 401 Project Status Sheet

Spring 2018

Name:	Mackenzie Tjogas	Date:	April 16 th 2018
Project:	PurpleRun	Period Covered:	April 2 nd - April 16th

Accomplishments since last report:

- Completed all of the information pages, every one has all of the links it needed
- Added information on how to clear a browser's history
- Decided that the language translation API will not work for the purpose of the app because the links will lead to information in english regardless.

Scheduled tasks to be done by next report:

- Update documentation about the change/decision on the language translation
- Make it so that when a user clicks a link and are taken to it, they can easily click back into the app (and be where they were before the link).

Noteworthy risks, concerns, or problems:

- Issues with the linking remaining inside the app
